

CISO Advisory Services

Think of it as CISO-as-a-Service, providing expertise that guides your business in the battle against evolving cyber threats

Service Overview

Cybersecurity is an essential part of doing business. However, many face resources and skills shortages to do this effectively. CloudGuard's CISO Advisory Services offer expert guidance to protect your business against the rising threats and challenges. Whether it's strategy definition, internal cyber skills development or cost optimisation, we ensure you and your team are equipped to proactively mitigate risks and respond effectively to cyber threats.

Capabilities

We offer a comprehensive range of capabilities to improve your cybersecurity posture from security maturity assessments and governance oversight to IT environment security design and cyber strategy roadmaps. We provide customised support to meet your specific requirements. Our expert consultants work collaboratively with your team to identify threats, establish robust security strategies, and implement remediation plans.

Benefits

Our experienced consultants have a wide range of expertise, ranging from IT security to cloud services management and compliance certifications. They excel in ROI investment cases, cyber strategy optimisation, and emerging challenges. No matter the maturity level of your business, they can provide:

-  Tailored expertise for your cybersecurity needs
-  Comprehensive range of capabilities and services
-  Proactive risk mitigation and compliance assurance
-  Collaborative partnership approach
-  Customised solutions to improve cybersecurity posture

Why CISO Advisory?

Our services help organisations lacking a cybersecurity strategy, those needing expert guidance to achieve goals, those affected by cyber events, and those seeking continual improvement. Whatever your maturity level, our CISO Advisory Services can complement and deliver expertise to improve posture and further reduce business risks and exposure.

CISO Advisory Areas

Define Strategy: Collaborate with CTOs to align security strategy with business objectives.

Assess Maturity: Thoroughly evaluate culture, processes, and technologies.

Investment Case: Develop optimal cybersecurity strategy, including ROI analysis and business cases.

Governance Oversight: Provide ongoing support to minimise risk and ensure compliance.

Skills Development: Create training programs to enhance security awareness.

Assurance: Conduct code reviews and vulnerability assessments.

Security Design: Guide IT infrastructure development for robust security.

Strategy Roadmap: Work together to select and implement effective cybersecurity strategies within budget.

About CloudGuard®

CloudGuard is a leading Managed Security Services Provider (MSSP), offering a range of services to protect organisations against evolving cyber threats. With a focus on proactive threat detection, automated response, and responsive support, CloudGuard helps businesses to navigate the complexities of the digital landscape securely.
